

# 2024 NATIONAL ENVIRONMENTAL SCORECARD

SECOND SESSION OF THE 118TH CONGRESS

## LCV BOARD OF DIRECTORS \*

---

**JOHN H. ADAMS, HONORARY**  
Natural Resources Defense Council

**ROXANNE D. BROWN**  
United Steelworkers

**THE HONORABLE CAROL BROWNER, CHAIR**  
Former EPA Administrator

**BRENDON CECHOVIC**  
Western Conservation Foundation

**CARRIE CLARK, SECRETARY**  
North Carolina League of Conservation  
Voters

**REPRESENTATIVE DONNA EDWARDS**  
Former Member of Congress

**MICHAEL C. FOX**  
SARHEN Strategies

**ELAINE FRENCH**  
The John and Elaine French Family  
Foundation

**MARIA HANDLEY**  
The Wilderness Society

**RAMPA R. HORMEL, HONORARY**  
Enlyst Fund

**JOHN HUNTING, HONORARY**  
John Hunting & Associates

**MICHAEL KIESCHNICK**  
Green Advocacy Project

**ROGER KIM, VICE CHAIR**  
Climate and Clean Energy Equity Fund

**MARK MAGAÑA**  
GreenLatinos

**BRIONTÉ MCCORKLE**  
Georgia Conservation Voters

**WINSOME MCINTOSH, HONORARY**  
The McIntosh Foundation

**WILLIAM H. MEADOWS III, HONORARY**  
The Wilderness Society

**LISA MINSKY-PRIMUS**  
216 Fund

**GREG MOGA**  
Moga Investments LLC

**NING MOSBERGER-TANG**  
Innovo Foundation

**REUBEN MUNGER**  
Vision Ridge Partners, LLC

**BILL ROBERTS**  
Corridor Partners

**LARRY ROCKEFELLER, HONORARY**  
American Conservation Association

**THEODORE ROOSEVELT IV, HONORARY**  
**CHAIR**  
Barclays Capital

**KERRY SCHUMANN**  
Wisconsin Conservation Voters

**LAURA TURNER SEYDEL**  
Turner Foundation

**TRIP VAN NOPPEN, TREASURER**  
Earthjustice

**KATHLEEN WELCH**  
Corridor Partners

**ANTHA WILLIAMS**  
Bloomberg Philanthropies

**REVEREND LENNOX YEARWOOD, JR.**  
Hip Hop Caucus

## LCV ACCOUNTABILITY & ENDORSEMENTS COMMITTEE \*

---

**REPRESENTATIVE DONNA EDWARDS**  
Former Member of Congress

**MICHAEL C. FOX**  
SARHEN Strategies

**MARIA HANDLEY**  
The Wilderness Society

**MARK MAGAÑA**  
GreenLatinos

**GREG MOGA**  
Moga Investments LLC

**NING MOSBERGER-TANG**  
Innovo Foundation

**KERRY SCHUMANN, CHAIR**  
Wisconsin Conservation Voters

**TRIP VAN NOPPEN**  
Earthjustice

## LCV SCORECARD ADVISORY COMMITTEE \*

---

**ALEXANDRA ADAMS**  
Natural Resources Defense Council

**IRENE BURGA**  
GreenLatinos

**ALEX COHEN**  
Alaska Wilderness League

**ROBERT DEWEY**  
Defenders of Wildlife

**LISA FRANK**  
Environment America

**RAUL GARCIA**  
Earthjustice

**ANASTASIA GORDON**  
WE ACT for Environmental Justice

**ROSS GRIFFIN**  
National Wildlife Federation

**KATIE HARRIS**  
BlueGreen Alliance

**CHRISTINA HAZARD**  
National Parks Conservation Association

**TREVOR HIGGINS**  
Center for American Progress

**CRAIG LASHER**  
Population Action International

**BRIAN LASHIER**  
Union of Concerned Scientists

**JOSHUA PERKINS**  
Young, Gifted & Green

**MELINDA PIERCE**  
Sierra Club

**MICHELE ROBERTS**  
Environmental Justice Health Alliance

**LUKAS ROSS**  
Friends of the Earth

**FELICE STADLER**  
National Audubon Society

**KERRY SCHUMANN, CHAIR**  
Wisconsin Conservation Voters

**JOANNA SLANEY**  
Environmental Defense Fund

**KATHY TSANTIRIS**  
Ocean Conservancy

**LYDIA WEISS**  
The Wilderness Society

Voting Summary	4
Champions of Color Leading the Way	7

## 2. SENATE SCORES

Vote Descriptions	14
Senate Votes	18

## 3. HOUSE SCORES

Vote Descriptions	24
House Votes	34

The nonprofit League of Conservation Voters (LCV) has published a *National Environmental Scorecard* every Congress since 1970, the year it was founded by leaders of the environmental movement following the first Earth Day. LCV believes our earth is worth fighting for because everyone has a right to clean air, water, lands, and a safe, healthy community.

This edition of the *National Environmental Scorecard* provides objective, factual information about the most important environmental legislation considered and the corresponding voting records of all members of the second session of the 118th Congress. This *Scorecard* represents the consensus of experts from more than 20 respected environmental, environmental justice, and conservation organizations who selected the key votes on which members of Congress should be scored. LCV scores votes on the most important issues of the year, including energy, climate change, public health, environmental and racial justice, worker protection, democracy, public lands and wildlife conservation, and spending for environmental programs. The votes included in this *Scorecard* presented members of Congress with a real choice and help distinguish which legislators are working for environmental protection. Except in rare circumstances, the *Scorecard* excludes consensus action on the environment and issues on which no recorded votes occurred.

Dedicated environmentalists and national leaders volunteered their time to identify and research crucial votes. We extend special thanks to our Board of Directors, Accountability and Endorsements Committee, and Scorecard Advisory Committee for their valuable input.

**For two years in a row, House Republican leadership embraced chaos, their polluter allies and most extreme members, resulting in the least productive Congress in recent history, all at the cost of our environment, health, and economic wellbeing.**

Throughout 2024, Congress continued the trends of 2023, allowing uncertainty and manufactured crises to grind productivity to a halt. Over and over again, House leadership handed power to the most extreme members of their caucus, whose radical appropriations riders and messaging provisions made must-pass legislation unpalatable to their own caucus. Four times, leadership pulled bills from the House floor because they were too extreme for their own party. Meanwhile, the Senate continued moving strong judicial nominees forward and worked towards bipartisan agreement on government funding.

While Congress failed to act, people across the country faced the worsening impacts of the climate crisis. Throughout 2024, which was the hottest year on record for the second year in a row, communities experienced deadly heat waves, apocalyptic wildfires, record-breaking hurricanes that damaged coastal and inland areas, and catastrophic tornadoes and winter storms. It was another staggeringly expensive year for damages from climate change-fueled extreme weather events, with 27 disasters each costing over a billion dollars—in total, nearly \$200 billion. And 2025 commenced with horrific wildfires in Los Angeles, leveling whole sections of the megacity. As a result of climate change-fueled damages, in many parts of the country, homeowners saw insurance prices skyrocket or coverage became unavailable, as insurance companies cut and ran to reduce their climate change-fueled financial risks.

House Republican leadership created turmoil and disarray in basic functions that should have been

straightforward, like funding the federal government and providing relief from disasters. Congress narrowly avoided a number of government shutdowns as House Republicans attempted to pass bills so extreme that they splintered their own caucus. Extreme Republicans pushed for hundreds of amendments that undermined protections for people and the planet, making up 11 of 33 included House votes in the 2024 Scorecard. There were votes to block air pollution limits for cars, trucks, and power plants, stop support for domestic manufacturing, freeze funding for affordable clean energy projects, eliminate Endangered Species Act requirements for the military, end environmental justice programs, block efforts to make voting more accessible, and require more damaging, environmental law-exempt border wall construction. In some instances, they paired inadequate government funding bill text with extreme policy riders and provisions, including those that target people because of their gender, race, and other identities—and many of these failed to pass.

As they faced stalemates, House Republican leadership turned to the Congressional Review Act (CRA) as a tool that requires less consensus, yet if successful would have permanently repealed environmental, worker, and community protections. We included one House CRA vote, though many of the appropriations bills amendments we included were similar. Senate Republicans used the CRA as well to force votes to undermine similar protections, accounting for three of the eight votes scored last year. Ultimately, both chambers voted on CRAs that diminished consumer choice and peoples' protections,

which would have given more power and leeway to industry had it not been for President Biden's veto. The CRA is an extreme and blunt tool that anti-environmental members of Congress have used to permanently strip away protections for our environment, communities, wildlife, and natural heritage. While Congress attempted to block rules limiting tailpipe pollution and targeting government support to domestically-manufactured components, the president vetoed these actions.

Though the Senate did not have a large number of votes in 2024, leadership continued to confirm well-qualified federal judges for lifetime appointments. These judges reflect a diversity of racial, economic and identity backgrounds, and bring a variety of professional experience to the bench, particularly in public interest lawyering. The Senate approved 235 new judges, more than any other president and Senate in a four year period. These judges will provide long-term value to our country because the laws that protect our environment and democracy need judges with a variety of perspectives and experiences that reflect people in the U.S., and who will uphold and enforce those laws.

The Farm Bill, which is usually a bipartisan priority, was another victim of Republican failure to accomplish normal legislative business. Republicans continued to unsuccessfully attempt to raid climate smart agriculture, conservation, and clean energy funding appropriated by the affordable clean energy plan. Congress extended expiring programs' authorizations for the second year in a row, through the end of 2025.

Finally, in a year defined by chaos and inaction, Congress did pass a few bipartisan bills, including to reduce oversight of nuclear energy, increase exemptions to environmental review for some drilling for advanced geothermal energy, and reauthorize the Water Resources Development Act and the American Conservation Enhancement Act. Given environmental groups' range of opinions on these bills, as well as the lopsided nature of the approvals of the reauthorizations, we did not include them in this year's *Scorecard*.

Looking ahead to the 119th Congress, with a shift in power in the Senate and White House to anti-environmental and anti-democracy leadership, recent progress and bedrock laws will be at risk. We will continue to defend both and hold elected officials accountable to their positions, as we have for over five decades.

## Inflation Reduction Act Repeal Votes Tracker

LCV along with Climate Power and the Climate Action Campaign continued to compile and update how many times Republicans held recorded votes to repeal the landmark climate and clean energy plan and other provisions of the law over the past two years—54 times and counting. This year saw 12 recorded votes on the House floor and 11 votes in committees and subcommittees.

\*\*\* Representative Neguse became Assistant Democratic Leader on March 20, 2024.

# CHAMPIONS OF COLOR LEADING THE WAY

The 2024 *National Environmental Scorecard* again demonstrates clear contrasts between the Senate and House, reflecting their pro- and anti-environment leadership. However, climate and democracy champions in both chambers defended critical clean energy investments in our communities and advanced solutions to climate and environmental justice. Many of the climate, conservation, environmental justice, and equitable democracy bills and initiatives in 2024 were led and supported by members of the Congressional Asian Pacific American Caucus (CAPAC), the Congressional Black Caucus (CBC), and the Congressional Hispanic Caucus (CHC), collectively referred to as the Tri-Caucus.

**House Democratic Leader Hakeem Jeffries (NY-08)\*** and **House Democratic Caucus Chair Pete Aguilar (CA-33)**, along with House Minority Whip Katherine Clark (MA-05), led their caucus' efforts to push back against Congressional Review Act attacks on environmental and community protections, including those on rules to boost domestic manufacturing of electric vehicle chargers and clean up tailpipe pollution. The leadership team also worked closely with the House Appropriations Committee Ranking Member Rosa DeLauro (CT-03), **Agriculture Subcommittee Ranking Member Sanford Bishop (GA-02)**, **Commerce, Justice, Science Subcommittee Ranking Member Grace Meng (NY-06)**, and other appropriators to fight many weeks of anti-environment votes on damaging spending cuts that would undermine initiatives our communities rely on, like basic clean air and water protections and historic Inflation Reduction Act (IRA) climate programs.

## CLIMATE

The impacts of climate change continue to worsen, and more communities are experiencing the harms

\* Tri-Caucus members are bolded in this section

Salinas (D-OR-06), Freshman Representative	100

**Rep. Vargas** uplifts the SEC climate rule at a press conference with Reps. Sherman and Casten.

of extreme weather, heat, drought, wildfire, and vector borne diseases. Congressional champions of color continued to work toward tackling the climate crisis and addressing its root causes, advancing a clean energy transition and lowering costs, and strengthening our communities' resilience as they face climate impacts.

## Financial Safeguards

This year, climate champions worked to hold large corporate polluters accountable for their climate impacts on investors and the general public. As ranking member of the House Financial Services Committee, **Representative Maxine Waters (CA-43)** led efforts to urge the Securities and Exchange Commission (SEC) to finalize the strongest possible rule to protect investors, including orchestrating a letter to the agency and defending the SEC's authority in committee hearings. As a founding co-chair of the Congressional Sustainable Investment Caucus and a member of the Financial Services Committee, **Representative Juan Vargas (CA-52)** also pushed to support a strong climate risk disclosure rule with a press conference, and he co-led a letter with Representative Sean Casten (IL-06) urging Congress to oppose all poison pill riders targeting sustainable investing strategies.

## Clean Energy and Transmission Acceleration Act

To meet our country's increasing energy demand and reliability needs, updates to our electricity grids and transmission systems are sorely needed. Building on his longtime leadership to tackle climate change and advancing affordable clean energy, **Representative Mike Levin (CA-49)** introduced critical legislation to address this need with Representative Casten: the Clean Energy and Transmission Acceleration (CETA) Act. The CETA

Act would prioritize transmission planning, public engagement, and buildout within and between regional grids, allowing affordable clean electricity to flow to where it is needed most and boosting reliability.

## Farm Bill

The Inflation Reduction Act (IRA) included the largest investment ever in conservation programs and climate-smart agriculture practices. These investments help to ensure the agricultural sector is part of the solution to climate change while also making our food systems more resilient and sustainable. Despite the popularity of these Department of Agriculture programs, House Republicans attempted to cut this funding in their version of the 2024 Farm Bill. Fortunately, climate champions like **House Agriculture Committee Ranking Member David Scott (GA-13)** and **Representative Gabe Vasquez (NM-02)** fought back against these efforts. **Scott** consistently pushed for the IRA climate-smart agriculture investments to be incorporated into the baseline of the Farm Bill, thus permanently increasing funding levels for these important, oversubscribed programs. During the committee mark-up, **Vasquez** helped lead the fight by offering an amendment to restore the critical climate-smart guardrails, which was supported by all committee Democrats.

## Climate Health and Resilience

Again this year, **Representative Lauren Underwood (IL-14)** introduced the Climate and Health Protection Act to strengthen the Centers for Disease Control and Prevention's (CDC) Climate and Health Program, the only federal program that supports state, tribal, territorial, and local governments in order to prepare for and mitigate the health impacts of climate change.

To help workers exposed to extreme heat, **Representatives Alma Adams (NC-12),**

**Judy Chu (CA-28), Bobby Scott (VA-03), and then-House Natural Resources Committee Ranking Member Raúl Grijalva**, along with **Senators Alex Padilla (CA)** and Sherrod Brown (OH), continued to advocate for their Asunción Valdivia Heat Illness, Injury, and Fatality Prevention Act and welcomed protections proposed from the Occupational Safety and Health Administration (OSHA) in July, the hottest month on record. Chu also joined **Representatives Greg Casar (TX-35)** and Jamie Raskin (MD-08) in urging the U.S. Postal Service to implement the proposed rule straightaway.

## Clean Transportation

Environmental champions in Congress have been working tirelessly to defend clean transportation progress. **Senator Padilla** led the charge on the Senate floor against attacks that would overturn EPA regulations to protect our air from harmful transportation pollution. **Representative Raul Ruiz (CA-25)** also took to his chamber's floor to defend the cleaner cars rules, drawing on his experience as a physician to speak about the negative health impacts of eliminating the regulations. Champions in Congress continued to fight against rollbacks of clean energy incentives, including **Representative Jimmy Gomez (CA-34)**, who defended against attempts to eliminate consumer incentives for used electric vehicles.

**Rep. Ruiz** announcing legislation to designate the Chuckwalla National Monument at a press conference, delivering over 800,000 petitions for national monument designations with **Sen. Padilla** and **Rep. Chu**.

## INFLATION REDUCTION ACT IMPLEMENTATION

Throughout 2024, congressional climate champions around the country held dozens of in-district events—from press conferences to town halls—to raise awareness about how to access the consumer and community-facing benefits of the Inflation Reduction Act (IRA). They educated constituents about home energy rebates and "direct pay" resources that could help schools, faith institutions, hospitals, and government buildings transition to affordable clean energy. They showcased large-scale solar, wind, and clean energy manufacturing investments in their districts that are creating family-sustaining jobs. These influential in-district events were led by **Senator Tammy Duckworth (IL)** and **Representatives Shontel Brown (OH-11), Yvette Clarke (NY-09), Veronica Escobar (TX-16), Jahana Hayes (CT-05), Steven Horsford (NV-04), Raja Krishnamoorthi (IL-08), Jennifer McClellan (VA-04), Ritchie Torres (NY-15), Nydia Velázquez (NY-07), and Bobby Scott (VA-03)** among many others.

## CONSERVATION

### Monuments

This year, conservation champions in Congress successfully continued efforts to protect our public lands and waters across the country. In the House, **Representative Ruiz** introduced the Chuckwalla National Monument Establishment Act and the Joshua Tree National Park Expansion Act and **Ranking Member Grijalva** introduced the Great Bend of the Gila National Monument Establishment Act, both seeking to protect environmentally

and culturally important landscapes in southern California and Arizona, respectively. **Representative Chu** celebrated the expansion of the San Gabriel Mountains National Monument by presidential proclamation, which followed her reintroduction of a bill to do the same. **Senator Padilla** advocated for the San Gabriels monument expansion as well, while also teaming up with **Senator Laphonza Butler (CA)** to introduce legislation and urge President Biden to protect the Chuckwalla National Monument and the Sáttitla National Monument, which Biden did in January 2025.

**Representative Salud Carbajal (CA-24)** has been a tireless champion for the yearslong tribally- and locally-led effort to establish the Chumash Heritage National Marine Sanctuary off California's central coast, which came to fruition in October 2024.

Leading efforts to preserve culturally significant places, **Senator Tammy Duckworth (IL)** introduced the Springfield 1908 Race Riot National Monument Act, part of the effort that led to the designation of the monument. In similar fashion, **Senator Catherine Cortez Masto (NV)** introduced legislation to establish the Bahsahwahbee National Monument, honoring a sacred Indigenous site in Nevada. She also continued her commitment to additional public land protections through mineral withdrawals for the Ash Meadows National Wildlife Refuge.

## National Environmental Policy Act

**Ranking Member Grijalva** also continued to lead opposition to schemes undermining the National Environmental Policy Act (NEPA), the Endangered Species Act (ESA), and other bedrock environmental laws, including the Fix Our Forests Act and Energy Permitting Reform Act. The NEPA process ensures that communities know about environmental and health impacts from potential projects and can

**Rep. Grijalva** at a press conference for climate action with Sen. Markey and **Rep. Ocasio-Cortez**.

provide input to improve, change, or stop proposed projects. He led a Supreme Court amicus brief with Senator Ed Markey (MA) and 28 other members of the House on the *Seven County Infrastructure Coalition v. Eagle County, CO. (Seven Counties)* case, highlighting the importance of NEPA in analyzing how governmental actions impact climate change and environmental injustice.

## DEMOCRACY SCOTUS Ethics and Reform

In the face of unprecedented judicial ethics crises and a relentless power grab by the Supreme Court's extreme justices, **Representative Hank Johnson (GA-04)** pioneered efforts to restore integrity and balance to the nation's highest court. He sponsored critical legislation, including the Judiciary Act and the Supreme Court Ethics, Recusal, and Transparency Act. Along with LCV and Accountable.US, **Johnson** led the successful push for Justice Neil Gorsuch to recuse himself from a major environmental case, *Seven Counties*. **Johnson** and colleagues, including **Representative Jasmine Crockett (TX-30)**, also launched the Court Reform Now Task Force.

**Rep. Johnson** at a press conference in the pouring rain calling for the expansion of the Supreme Court along with Sen. Markey.

## Judicial Nominations

As President Biden appointed a historically high number of people of color to federal judgeships, many nominees of color faced racist vitriol from opposing senators. Judiciary Committee Members **Senators Mazie Hirono (HI), Cory Booker (NJ), Padilla, and Butler** have been tireless advocates for the inclusive, multiracial judiciary the people deserve, and their work has been essential to confirming the most diverse and civic-minded slate of judicial appointees in the nation's history.

## Voting Rights

After more than a decade of attacks on the Voting Rights Act of 1965 by the Supreme Court's extreme justices, voter suppression and gerrymandering continue to rise, but so do efforts to address them. **Senators Reverend Raphael Warnock (GA), Booker, and Butler** joined with colleagues including members of Senate leadership to reintroduce the John R. Lewis Voting Rights Advancement Act, an essential bill to restore and modernize our most effective civil rights law.

*"This legislation is more important than ever because the fight to protect voting rights and voting access for every eligible American remains unfinished."*

— Senator Reverend Warnock

## DIRTY ENERGY

### NOW Act and CLEAN Energy Act

In 2024, environmental champions kept up the fight to decouple public leases for fossil fuels from those for renewable energy. **Representative Alexandria Ocasio-Cortez (NY-14)** sponsored the Nonrestrictive Offshore Wind (NOW) Act to address offshore energy, and **Representative Sydney Kamlager-Dove (CA-37)** sponsored the Comprehensive Legislation for Expanding and Advancing Nonrestrictive (CLEAN) Energy Act to address onshore energy.

## Make Polluters Pay

It is critical that we hold oil and gas polluters accountable for the damage they have done to people and the planet. This year, **Representative Nanette Barragán (CA-44)** introduced the Big Oil Collusion Accountability Act, to assign responsibility to big oil and gas companies for fueling the climate crisis and to protect public lands from future drilling. **Representative Chu** joined colleague Representative Jerry Nadler (NY-12) to introduce the Polluters Pay Climate Fund Act, which would require the biggest polluters to pay into a \$1 trillion fund to support communities threatened or damaged by climate change.

**Rep. Barragán** at a press conference calling out polluter price gouging and the need for accountability for big oil and gas corporations with **Rep. Kamlager-Dove**.

Members of Congress also publicly pressed for polluter accountability with news conferences, including **Representatives Barragán, Kamlager-Dove, Joe Neguse (CO-02), and Ilhan Omar (MN-05)**.

## LNG

In January 2024, the Biden-Harris administration announced a pause in approvals of new liquefied methane gas (LNG) export projects as the Department of Energy (DOE) worked to update analysis on the impacts of LNG exports. As a part of a press conference, **Representatives Grijalva, McClellan** and **Pramila Jayapal (WA-07)** spoke out in support of this historic action.

Following the announcement of the pause, **Jayapal** joined Senator Sheldon Whitehouse (RI) on a tour of various toxic sites in Port Arthur, Texas, to understand the devastating impacts that oil and gas corporations have had on frontline communities.

**Representatives Barragán, Crockett, Tony**

**Cárdenas (CA-29), Maxwell Frost (FL-10), and Doris Matsui (CA-07)** spoke out in committee and on the House floor to debunk oil and gas execs' talking points, counter Republican attacks, and share their support for DOE assessing the full impacts of LNG exports on people and the planet.

In May, environmental champs including **Representatives Grijalva, McClellan, Barragán, and Adriano Espaillat (NY-13)** led a successful letter thanking the administration for announcing a pause in new LNG exports approvals and urging DOE to finalize robust studies.

## HEALTHY COMMUNITIES

### Lead and Copper

Environmental and public health champions in both chambers urged the Environmental Protection Agency (EPA) to finalize strong requirements for all lead pipes across the country to be replaced within 10 years.

**Senators Booker and Duckworth** led the Senate Lead Task Force to create long-term visibility around the public health crisis of lead, push for a strong rule to protect all communities from lead poisoning, and oversee state and federal implementation of lead pipe removal and replacement funding.

In the House, **Representatives Rashida Tlaib (MI-12), Barbara Lee (CA-12), and Lisa Blunt Rochester (DE-AL)** helped lead the parallel Get the Lead Out Caucus effort with letters to EPA and the Office of Management and Budget urging the finalization of a strong Lead and Copper Rule Improvements.

# 2024 SENATE VOTE DESCRIPTIONS

## **1. OVERRIDING THE VETO THAT MAINTAINED THE U.S.-MADE EV CHARGERS RULE**

The Senate attempted to override the president's veto of Senator Marco Rubio's (R-FL) S.J. Res. 38, a Congressional Review Act (CRA) resolution of disapproval, which would repeal the Federal Highway Administration's tailored Buy America waiver and replace it with a general waiver. The CRA is an extreme and blunt tool that is being used by anti-environmental members of Congress who want to permanently strip away protections for our environment, communities, wildlife, and natural heritage. This resolution would hinder efforts to expand the electric vehicle charging network, while hurting U.S. manufacturing workers and communities. Since the establishment of the tailored waiver, electric vehicle service equipment (EVSE) manufacturers have announced more than \$27 million in investments for new facilities across the country. Such investments have the potential to create good union jobs for workers building and installing EVSE equipment. The more general waiver that this resolution seeks to reinstate in place of the tailored waiver would slow down the EV transition at the expense of these same workers. On February 29, the Senate failed to override the veto of S.J. Res. 38 by a vote of 50–47 (A two-thirds majority was required to override the veto; Senate roll call vote 61). **NO IS THE PRO-ENVIRONMENT VOTE.**

## **2. BERNER CONFIRMATION (4TH CIRCUIT COURT OF APPEALS)**

The Senate considered President Joe Biden's nomination of Nicole G. Berner to serve as a judge of the United States Court of Appeals for the 4th Circuit, which has jurisdiction over Maryland, Virginia, West Virginia, North Carolina, and South Carolina. Federal judges serve for life and the laws that protect our environment and democracy need judges who will uphold and enforce them. Berner has over 20 years of high-stakes litigation experience at both trial and appellate levels, in both federal and state courts, across numerous critical areas of public interest. Her commitment to equal justice for all pervades her distinguished career. Berner has been one of the nation's leading labor lawyers and has worked to safeguard access to reproductive rights and healthcare. She is also the first openly LGBTQ+ judge ever appointed to the 4th Circuit. On March 19, the Senate confirmed Berner to be a judge of the United States Court of Appeals for the 4th Circuit by a vote of 50–47 (Senate roll call vote 94). **YES IS THE PRO-ENVIRONMENT VOTE.**

## **3. UNDERMINING THE TRACKING OF CLIMATE PROGRESS IN TRANSPORTATION**

Senator Kevin Cramer (R-ND) sponsored S.J. Res. 61, a Congressional Review Act (CRA) resolution of disapproval, which would repeal the Federal Highway Administration's (FHWA) rule setting a national performance management measure for greenhouse gas (GHG) emissions. The CRA is an extreme and blunt tool that is being used by anti-environmental members of Congress who want to permanently strip away protections for our environment, communities, wildlife, and natural heritage. S.J. Res. 61 would eliminate the FHWA's framework that provides transparent and uniform, yet flexible, guidance to states on how to evaluate and track the GHG emissions impacts of their transportation investments. The GHG performance measure helps states set emissions reduction targets to ultimately maximize transportation benefits to their communities. On April 10, the Senate approved S.J. Res. 61 by a vote of 53–47 (Senate roll call vote 121). **NO IS THE PRO-ENVIRONMENT VOTE.** The House took no action on this legislation.

#### **4. OBSTRUCTING EPA'S CLEANER CARS RULE**

Senator Mike Crapo (R-ID) sponsored S. 4072, A Bill to Prohibit the Use of Funds to Implement, Administer, or Enforce Certain Rules of the Environmental Protection Agency (EPA), which would prohibit funding and finalization of the EPA's Cleaner Cars Rules. Tailpipe emission standards help to clean our air, broaden vehicle choices for consumers while saving them money, and tackle the climate crisis. This bill would undermine our ability to reduce vehicle pollution, the leading source of climate pollution, and spur domestic auto manufacturing. On April 18, the Senate rejected S. 4072 by a vote of 52–46 (60 votes were needed for passage; Senate roll call vote 142). **NO IS THE PRO-ENVIRONMENT VOTE.**

#### **5. BLOCKING GAS FURNACE EFFICIENCY STANDARDS**

Senator Ted Cruz (R-TX) sponsored S.J. Res. 58, a Congressional Review Act (CRA) resolution of disapproval, which would repeal the Department of Energy's (DOE) rule to implement an energy efficiency standard for household gas furnaces. The CRA is an extreme and blunt tool that is being used by anti-environmental members of Congress who want to permanently strip away protections for our environment, communities, wildlife, and natural heritage. If enacted, S.J. Res. 58 would stick families with higher average annual home heating bills by forcing them to rely on outdated, inefficient technology. Higher efficiency standards, which are mandated under a court-approved settlement and have not been updated since 1987, would also reduce climate-related emissions and other harmful pollutants, improving overall public health. On May 21, the Senate approved S.J. Res. 58 by a vote of 50–45 (Senate roll call vote 176). **NO IS THE PRO-ENVIRONMENT VOTE.** The House took no action on this legislation.

#### **6. MALDONADO CONFIRMATION (7TH CIRCUIT COURT OF APPEALS)**

The Senate considered President Joe Biden's nomination of Nancy L. Maldonado to serve as a judge of the United States Court of Appeals for the 7th Circuit. The 7th Circuit is one of the nation's most powerful courts, with jurisdiction over Illinois, Indiana, and Wisconsin. Federal judges serve for life and the laws that protect our environment and democracy need judges who will uphold and enforce them. As a litigator in private practice, Maldonado demonstrated her commitment to equal justice for all in fighting for the rights of working people facing employment discrimination and unfair labor practices, including farmworkers who had previously been denied fair overtime and paid rest breaks. In her recent service as a judge of the United States District Court for the Northern District of Illinois, Maldonado followed an evenhanded approach and allowed plaintiffs in important cases about excessive use of force, sexual harassment, and disability discrimination to move forward. In addition to her exemplary professional qualifications, Maldonado was the first Latina judge ever to serve on any Illinois federal court and is now the first Latina judge ever appointed to the 7th Circuit. On July 8, the Senate confirmed Maldonado to be a judge of the United States Court of Appeals for the 7th Circuit by a vote of 47–43 (Senate roll call vote 203). **YES IS THE PRO-ENVIRONMENT VOTE.**

## **7. ALI CONFIRMATION (D.C. DISTRICT)**

The Senate considered President Joe Biden's nomination of Amir Ali to serve as a judge of the United States District Court for the District of Columbia. With jurisdiction over the nation's capital and many critical cases on environmental law, voting rights, campaign finance, and more, the D.C. District is one of the nation's most powerful courts. Federal judges serve for life and the laws that protect our environment and democracy need judges who will uphold and enforce them. Prior to his judicial service, Ali was a distinguished litigator with extensive experience serving the public interest, including serving as President & Executive Director of the MacArthur Justice Center and co-director of the criminal justice appellate clinic at Harvard Law School. Through his work to advance civil rights and due process for criminal defendants as well as people subjected to excessive force by police officers, Ali has demonstrated a commitment to a judicial system that serves equal justice under law for all people, not just the wealthy and powerful. Beyond his exemplary professional qualifications, Ali is only the fourth Muslim American ever appointed to the federal judiciary. On November 20, the Senate confirmed Ali to be a judge of the United States District Court for the District of Columbia by a vote of 50–49 (Senate roll call vote 291). **YES IS THE PRO-ENVIRONMENT VOTE.**

## **8. MCFERRAN CONFIRMATION (NATIONAL LABOR RELATIONS BOARD)**

The Senate considered President Joe Biden's nomination of Lauren McGarity McFerran to be a member of the National Labor Relations Board (NLRB). The NLRB is the nation's principal agency charged with protecting the rights of workers to organize and advocate for improved working conditions and safety. Environmental protection and labor rights are inextricably linked by the need for a healthy democracy that empowers people to hold powerful business interests accountable. McFerran's long tenure on the NLRB and distinguished career in public service demonstrate her qualifications and commitment to fairness. If confirmed, her reappointment would have secured a pro-worker majority on the NLRB until 2026. On December 11, the Senate failed to invoke cloture on McFerran's confirmation by a vote of 49–50 (Senate roll call vote 320). **YES IS THE PRO-ENVIRONMENT VOTE.**

<sup>d</sup> Senator Helmy was sworn in on August 23, 2024 and resigned on December 8, 2024.

e Then-Representative Andy Kim resigned from the House of Representatives on December 8, 2024 and was sworn into the Senate on December 9, 2024 following his election victory. The displayed scores reflect his one vote in the Senate combined with his House votes.

<sup>f</sup> Senator Bob Menendez resigned on August 20, 2024, following his conviction on federal bribery charges.

# 2024 HOUSE VOTE DESCRIPTIONS

## **1. UNDERMINING THE FEDERAL GOVERNMENT'S AUTHORITY ON LNG**

Representative August Pfluger (R-TX) sponsored H.R. 7176, the so-called Unlocking our Domestic LNG Potential Act of 2024, which would abdicate the federal government's responsibility to examine the full impacts of liquefied methane gas (otherwise known as liquefied natural gas or LNG) expansion on U.S. energy markets, the environment, local communities, and consumers. Specifically, this bill would strip the federal government's ability and responsibility to properly analyze the impacts of LNG on climate disruption, unstable energy prices, and continued health and safety impacts, particularly for frontline communities. This bill would also undermine the commonsense pause that the Biden-Harris administration put on approvals of new LNG export projects while the Department of Energy (DOE) updates its approach to reviewing such projects. This reevaluation will address longstanding shortcomings in DOE's outdated and incomplete approach to determining whether LNG export projects are in the public interest, including factoring in impacts on costs to U.S. families and businesses, climate impacts, and environmental justice.

On February 15, the House passed H.R. 7176 by a vote of 224–200 (House roll call vote 52). **NO IS THE PRO-ENVIRONMENT VOTE.** The Senate took no action on this legislation.

## **2. ATTACKING CRITICAL OIL AND GAS LEASING REFORMS**

Representative Lauren Boebert (R-CO) sponsored H.R. 6009, the so-called Restoring American Energy Dominance Act, which would require the Bureau of Land Management (BLM) to withdraw its proposed Onshore Oil and Gas Leasing Rule and prevent the Department of the Interior (DOI) from proposing any substantially similar rule, hampering DOI's ability to oversee the federal leasing program. BLM's proposed Onshore Oil and Gas Leasing Rule would update federal regulations to implement oil and gas program fiscal reforms enacted via the Inflation Reduction Act (IRA), including increasing the royalty rate for producing oil and gas on federal public lands, realigning rents and fees to account for inflation, and reducing speculation by ending non-competitive leasing and implementing a new nomination fee. The proposed rule would also include additional protections, such as language to penalize routine abusers; preference criteria to steer leasing decisions away from critical habitats, cultural resources, and reduce speculation; and urgent bonding reforms to help ensure that oil and gas operators bear the cost of cleaning up drilling sites after production ends instead of placing the burden on taxpayers and surrounding communities. On March 20, the House approved H.R. 6009 by a vote of 216–200 (House roll call vote 95). **NO IS THE PRO-ENVIRONMENT VOTE.** The Senate took no action on this legislation.

## **3. ROLLING BACK CLEAN WATER SAFEGUARDS**

Representative David Rouzer (R-NC) sponsored H.R. 7023, the so-called Creating Confidence in Clean Water Permitting Act, which would jeopardize the clean water our families, communities, and wildlife depend on. Numerous provisions in the bill would shield polluters from taking responsibility when they destroy or dump pollutants into our streams, lakes, wetlands, and other waters, which ultimately passes the burden of pollution and costs onto downstream communities. The legislation would undermine the Environmental Protection Agency's (EPA) process for permitting and updating water quality criteria; make it easier for polluters to dump pollutants like per- and polyfluoroalkyl substances (PFAS) into our waters; eliminate the EPA's ability to stop the most devastating projects; fast-track permitting for destructive oil and gas pipelines;

and severely limit judicial review and public input. Unfortunately, at a time when our waters are more vulnerable than ever, this legislation prioritizes polluter profits instead of public health, and it would especially impact communities of low wealth and communities of color. On March 21, the House approved H.R. 7023 by a vote of 213–205 (House roll call vote 101). **NO IS THE PRO-ENVIRONMENT VOTE.** The Senate took no action on this legislation.

#### **4. REPEALING ACTIONS ON CLIMATE AND ENVIRONMENTAL JUSTICE**

Representative Gary Palmer (R-AL) sponsored H.R. 1023, the so-called Cutting Green Corruption and Taxes Act, which would roll back climate and environmental justice programs established in the Inflation Reduction Act (IRA) and jeopardize clean air for our families and communities. The bill would repeal the Greenhouse Gas Reduction Fund (GGRF), which invests \$27 billion of federal funding and a much larger amount of private capital in financing critical climate and clean energy projects across the country, especially in historically underserved communities. H.R. 1023 would also repeal the Methane Emissions Reduction Program (MERP), which cuts dangerous methane and other air pollution from the oil and gas industry. These important provisions create good-paying jobs, tackle climate change, and clean up the air we breathe, especially in communities of low wealth and communities of color, which are disproportionately lacking in clean energy investments and on the frontlines of oil and gas drilling. On March 22, the House approved H.R. 1023 by a vote of 209–204 (House roll call vote 104). **NO IS THE PRO-ENVIRONMENT VOTE.** The Senate took no action on this legislation.

#### **5. STYMIEING PUBLIC LANDS CONSERVATION**

Representative John Curtis (R-UT) sponsored H.R. 3397, the so-called Western Economic Security Today (WEST) Act of 2023, which would require the Bureau of Land Management (BLM) to withdraw the Conservation and Landscape Health Rule. This critical rule would improve the stewardship of millions of acres of federally owned lands across the United States and ensure conservation and recreation on public lands are at least on equal footing with extractive uses. Among other benefits of the rule, it would safeguard clean water and wildlife habitat, task BLM to rehabilitate lands and waters to an ecosystem health standard, and require informed management decisions based on science, data, and traditional Indigenous knowledge. On April 30, the House approved H.R. 3397 by a vote of 212–202 (House roll call vote 165). **NO IS THE PRO-ENVIRONMENT VOTE.** The Senate took no action on this legislation.

#### **6. PERPETUATING DANGEROUS LEAD EXPOSURE**

Representative Robert Wittman (R-VA) sponsored H.R. 615, the so-called Protecting Access for Hunters and Anglers Act of 2023, which would prohibit the Departments of Interior and Agriculture from protecting human health, wildlife, and our environment from toxic lead in ammunition and fishing tackle. Lead-based ammunition is the single largest source of unregulated lead discharged into our lands and waters. There is no safe level of lead exposure, and even minuscule lead fragments can contaminate meat and produce lasting neurological deficits in intelligence and behavior of children. The United States Geological Survey (USGS) also found that over half of bald eagles and golden eagles are likely suffering from lead poisoning as a result of lead ammunition. On April 30, the House approved H.R. 615 by a vote of 214–201 (House roll call vote 167). **NO IS THE PRO-ENVIRONMENT VOTE.** The Senate took no action on this legislation.

## **7. UNDERMINING WILDLIFE PROTECTIONS AND THE ENDANGERED SPECIES ACT**

Representative Lauren Boebert (R-CO) sponsored H.R. 764, the so-called Trust the Science Act, which would direct the secretary of the Interior to reissue a 2020 rule that inappropriately stripped the gray wolf of Endangered Species Act (ESA) protections in 44 states. The bill would bar judicial review of the secretary's action, delist the wolf, set a dangerous anti-wildlife and anti-fair process precedent, and compromise the integrity of the ESA. On April 30, the House approved H.R. 764 by a vote of 209–205 (House roll call vote 169). **NO IS THE PRO-ENVIRONMENT VOTE.** The Senate took no action on this legislation.

## **8. RESCINDING PROTECTIONS FOR THE BOUNDARY WATERS**

Representative Pete Stauber (R-MN) sponsored H.R. 3195, the so-called Superior National Forest Restoration Act, which would rescind mining protections for the Superior National Forest watershed that flows into the Boundary Waters Canoe Area Wilderness and Voyageurs National Park in northeastern Minnesota. The bill would also automatically reinstate the canceled mineral leases of Chilean mining giant Antofagasta, place an arbitrary and expedited 18 month timeline on any future permits or leasing, and would block any judicial review of granted mineral leases, further undermining public input and due process. A copper sulfide-ore mine and its waste in this watershed would threaten the Boundary Waters, which are the most visited Wilderness in the country. On April 30, the House approved H.R. 3195 by a vote of 212–203 (House roll call vote 171). **NO IS THE PRO-ENVIRONMENT VOTE.** The Senate took no action on this legislation.

## **9. ROLLING BACK CRITICAL ARCTIC PROTECTIONS**

Representative Pete Stauber (R-MN) sponsored H.R. 6285, the so-called Alaska's Right to Produce Act of 2023, which would threaten millions of acres of wildlands in America's Arctic. The bill would mandate that seven illegal Trump administration oil leases be reissued in the Arctic National Wildlife Refuge, threatening the calving grounds of the herd of over 200,000 Porcupine caribou. Harming the caribou herd also threatens the Gwich'in people who have depended on this herd for millennia. The bill would also eliminate new conservation protections for 13 million acres of designated special areas in the Western Arctic and repeal longstanding protections from oil and gas development on 125 million acres of the Arctic Ocean. On May 1, the House approved H.R. 6285 by a vote of 214–199 (House roll call vote 174). **NO IS THE PRO-ENVIRONMENT VOTE.** The Senate took no action on this legislation.

## **10. OBSTRUCTING APPLIANCE EFFICIENCY STANDARDS**

Representative Debbie Lesko (R-AZ) sponsored H.R. 6192, the Hands Off Our Home Appliances Act, which would effectively block the Department of Energy (DOE) from setting appliance efficiency standards that lower consumer costs and reduce energy and water waste. By ignoring the utility bill savings of more efficient appliances, this bill would block new money-saving efficiency standards, force customers to rely on outdated, inefficient technology, and could jeopardize existing specifications for household appliances. Appliance efficiency standards relieve stress on the energy grid and already tight water supplies, support an industry that employs millions of people in nearly every county, and lead to improved air quality and public health in communities disproportionately impacted by air pollution. On May 7, the House approved H.R. 6192 by a vote of 212–195 (House roll call vote 184). **NO IS THE PRO-ENVIRONMENT VOTE.** The Senate took no action on this legislation.

## **11. JEOPARDIZING PUBLIC LANDS WITH MINING**

Representative Mark Amodei (R-NV) sponsored H.R. 2925, the Mining Regulatory Clarity Act of 2024, which would give any mine claimant—including foreign mining companies—rights to permanently occupy public lands. Under this bill, anyone—for a nominal fee—could gain permanent rights to occupy public lands and preclude all other uses, even without evidence of minerals available to mine. This would lead to unintended consequences, including preventing recreational, traditional and cultural uses, and renewable energy development and transmission on public lands under the claim. On May 8, the House approved H.R. 2925 by a vote of 216–195 (House roll call vote 191). **NO IS THE PRO-ENVIRONMENT VOTE.** The Senate took no action on this legislation.

## **12. IMPERILING ENDANGERED SPECIES ON MILITARY LAND**

Representative Andy Biggs (R-AZ) sponsored an amendment to H.R. 8070, the Servicemember Quality of Life Improvement and National Defense Authorization Act for Fiscal Year 2025, which would exempt defense-related activities from the Endangered Species Act (ESA). This amendment would carve out a massive loophole in the ESA, undermine science, and ignore the long-standing partnership among the Department of Defense (DOD), U.S. Fish and Wildlife, and state wildlife agencies to conserve species and resources on DOD designated military lands. Those military lands support the preservation of ecologically important native habitats for fish, wildlife, and plant species, including over 400 threatened and endangered species. On June 12, the House rejected the Biggs amendment by a vote of 196–231 (House roll call vote 255). **NO IS THE PRO-ENVIRONMENT VOTE.**

## **13. THREATENING FAMILIES SEEKING PATHWAY TO RESIDENCY**

Representative Chip Roy (R-TX) sponsored an amendment to H.R. 8752, the Department of Homeland Security Appropriations Act, 2025, which would prohibit funding for the Department of Homeland Security's process entitled "Process to Promote the Unity and Stability of Families." Advancing environmental justice requires a healthy democracy and immigration policies that respect the dignity and humanity of the people and communities most impacted by the climate crisis. This amendment would block humane action to keep families together and ensure hundreds of thousands of children and spouses of U.S. citizens can access their legal pathway to residency without threat of deportation. On June 26, the House rejected the Roy amendment by a vote of 193–216 (House roll call vote 293). **NO IS THE PRO-ENVIRONMENT VOTE.**

## **14. BLOCKING IMPROVED ACCESS TO VOTING**

Representative Claudia Tenney (R-NY) sponsored an amendment to H.R. 8771, the Department of State, Foreign Operations, and Related Programs Appropriations Act, 2025, which would prohibit funding for Executive Order 14019, relating to Promoting Access to Voting. This executive order is a critical effort to increase nonpartisan voter registration and participation through people's interactions with government agencies. This amendment would undermine this critical work and thwart common-sense, good-government innovations to better serve eligible voters and our democracy. On June 27, the House approved the Tenney amendment by a vote of 208–202 (House roll call vote 318). **NO IS THE PRO-ENVIRONMENT VOTE.** The Senate took no action on this legislation.

## **15. PREVENTING CONTRACTORS' CLIMATE EMISSIONS REPORTING**

Representative Claudia Tenney (R-NY) sponsored an amendment to H.R. 8774, the Department of Defense Appropriations Act, 2025, which would prevent the General Services Administration (GSA) and other agencies from finalizing a rule requiring “major” federal contractors who receive more than \$50 million in annual contracts to publicly disclose direct (Scope 1) and indirect (Scopes 2 & 3) upstream and downstream climate emissions, disclose climate-related financial risks, and set science-based emissions reduction targets. While only making up 13% of federal contractors, these major contractors are responsible for over 85% of all greenhouse gas emissions in the federal supply chain. Without these disclosures, the U.S. cannot substantiate or track progress against its own commitment to the Paris Climate Agreement, nor protect the federal government from climate and clean energy transition risks. On June 28, the House approved the Tenney amendment by a vote of 211–199 (House roll call vote 328). **NO IS THE PRO-ENVIRONMENT VOTE.** The Senate took no action on this legislation.

## **16. FUNDING THE HARMFUL BORDER WALL**

Representative Mark Amodei (R-NV) sponsored H.R. 8752, the Department of Homeland Security Appropriations Act, 2025, which would allocate \$600 million in new border wall funding, among other harmful provisions. Billions in taxpayer dollars have been spent to build hundreds of miles of unnecessary, wasteful, and harmful border wall, which has had a negligible impact on securing the border while creating more harm to communities, lands, Indigenous sites and culture, and biodiversity. H.R. 8752 also included numerous harmful poison pill policy riders that have little to do with homeland security, such as riders barring funds for women’s and transgender healthcare services, blocking rules designed to protect the endangered North Atlantic right whale and Rice’s whale from vessel strikes, and prohibiting efforts to promote racial justice and equity in federal agencies. On June 28, the House approved H.R. 8752 by a vote of 212–203 (House roll call vote 333). **NO IS THE PRO-ENVIRONMENT VOTE.** The Senate took no action on this legislation.

## **17. UNDERMINING INTERNATIONAL ACTION ON CLIMATE**

Representative Mario Diaz-Balart (R-FL) sponsored H.R. 8771, the Department of State, Foreign Operations, and Related Programs Appropriations Act, 2025, which would undermine our progress fighting the climate crisis at home and abroad. At a time when the United States should be doing more, not less, in the global fight against climate change, this bill proposed steep funding cuts that would undermine our international commitments on climate change and environmental protection. It would also prohibit funding from being used for climate change-focused executive orders and sought to undercut U.S. authority to regulate cross-border pipelines, including in ongoing State Department negotiations with Canada on Enbridge’s Line 5 pipeline. On June 28, the House approved H.R. 8771 by a vote of 212–200 (House roll call vote 335). **NO IS THE PRO-ENVIRONMENT VOTE.** The Senate took no action on this legislation.

## **18. REQUIRING PROOF OF CITIZENSHIP TO REGISTER FOR FEDERAL ELECTIONS**

Representative Chip Roy (R-TX) sponsored H.R. 8281, the Safeguard American Voter Eligibility Act or SAVE Act, which would require individuals to provide a document proving citizenship, such as a passport or birth certificate, when registering to vote in federal elections. Voting by ineligible non-citizens is extraordinarily rare, election administrators are already well equipped

to prevent it, and existing legal penalties for it are severe. The SAVE Act would seize on anti-immigrant fervor to make registering to vote significantly harder for many millions of eligible voters, including citizens born in the United States. It would thwart online voter registration, voter registration drives, and voter registration by mail. A majority of all United States citizens do not have passports. Many millions cannot readily access their birth certificates, and millions of people, particularly married women, do not have birth certificates showing their current legal name. Driver's licenses would not suffice even in states with existing strict voter ID requirements. A healthy environment requires an inclusive democracy in which every eligible voter can register, vote, and have their vote counted. This legislation would severely undermine that right. On July 10, the House passed H.R. 8281 by a vote of 221–198 (House roll call vote 345). **NO IS THE PRO-ENVIRONMENT VOTE.** The Senate took no action on this legislation.

#### **19. BARRING FUNDING FOR THE AMERICAN CLIMATE CORPS**

Representative Ralph Norman (R-SC) sponsored, and Representative Andy Ogles (R-TN) offered for debate, an amendment to H.R. 8997, the Energy and Water Development and Related Agencies Appropriations Act, 2025, which would defund the American Climate Corps. The American Climate Corps combines national service with workforce training to rally a new generation around the need to confront the climate crisis. It is building a versatile corps of more than 20,000 workers with the skills to help conserve and restore waters and lands, make our communities more resilient, speed the shift to clean energy, and advance environmental justice. It is prioritizing historically underserved communities, including the energy communities that have powered the nation for generations, and helping meet the Biden-Harris administration's Justice40 goal. On July 23, the House approved the Norman amendment by a vote of 199–197 (House roll call vote 363). **NO IS THE PRO-ENVIRONMENT VOTE.** The Senate took no action on this legislation.

#### **20. BLOCKING THE DELAWARE RIVER BASIN FRACKING BAN**

Representative Scott Perry (R-PA) sponsored an amendment to H.R. 8997, the Energy and Water Development and Related Agencies Appropriations Act, 2025, which would prohibit the Delaware River Basin Commission from using funds to enforce their unanimously-passed ban on hydraulic fracturing, or fracking. Fracking could increase both air, water, and groundwater pollution and jeopardize the health of communities, drinking water sources, ecosystems, and wildlife that depend on the river. This amendment would thus compromise the long-term health and resilience of the Delaware River, its watershed and its residents. On July 23, the House rejected the Perry amendment by a vote of 195–210 (House roll call vote 364). **NO IS THE PRO-ENVIRONMENT VOTE.**

#### **21. STALLING DOMESTIC CLEANER VEHICLES MANUFACTURING**

Representative Scott Perry (R-PA) sponsored an amendment to H.R. 8997, the Energy and Water Development and Related Agencies Appropriations Act, 2025, which would eliminate funding for the Advanced Technology Vehicles Manufacturing (ATVM) Loan Program. This program provides loans to support the domestic manufacturing of advanced clean vehicles and their components. Transportation accounts for over a quarter of our greenhouse gas emissions and is the largest emitter by sector. The ATVM Loan Program is providing critical resources to domestically manufacture cleaner vehicles. Eliminating funding for the ATVM Loan Program would strip the

Department of Energy (DOE) of a key tool to advance U.S. clean transportation manufacturing. On July 23, the House rejected the Perry amendment by a vote of 147–267 (House roll call vote 365). **NO IS THE PRO-ENVIRONMENT VOTE.**

## **22. UNDERMINING NECESSARY TRANSMISSION IMPROVEMENTS**

Representative Chip Roy (R-TX) sponsored an amendment to H.R. 8997, the Energy and Water Development and Related Agencies Appropriations Act, 2025, which would prohibit funding for the Federal Energy Regulatory Commission's (FERC) Order 1920, effectively thwarting regulatory reforms necessary to advance the improvement and buildout of transmission infrastructure. FERC Order 1920 will help modernize our grids and vastly expand transmission to meet the existing and rapidly increasing demand for clean energy. Among other components, the rule requires that grid operators conduct long-term planning, thorough assessments of a region's future energy mix and demand, fair allocation of transmission costs, and identification of clean, efficient, and affordable energy solutions—which will help address issues that have prevented the buildout of interstate transmission lines and stalled clean energy projects. On July 23, the House rejected the Roy amendment by a vote of 209–213 (House roll call vote 375). **NO IS THE PRO-ENVIRONMENT VOTE.**

## **23. DEFUNDING COST-SAVING CLEAN ENERGY RESEARCH AND DEVELOPMENT**

Representative Chip Roy (R-TX) sponsored an amendment to H.R. 8997, the Energy and Water Development and Related Agencies Appropriations Act, 2025, which would eliminate funding for the Department of Energy's Office of Energy Efficiency and Renewable Energy (EERE). EERE plays a pivotal role in accelerating research, development, and demonstration of technologies and solutions that save families money on their energy costs and boost U.S. economic competitiveness and job creation. This work advances our national and energy security, reduces emissions of greenhouse gasses and other harmful pollutants, and ensures that the clean energy economy benefits all communities. Defunding EERE would put American clean energy innovation at risk. On July 23, the House rejected the Roy amendment by a vote of 144–277 (House roll call vote 376). **NO IS THE PRO-ENVIRONMENT VOTE.**

## **24. BLOCKING DIVERSITY, EQUITY, AND INCLUSION PROGRAMS AT ENVIRONMENTAL AGENCIES**

Representative Josh Brecheen (R-OK) sponsored an amendment to H.R. 8998, the Interior, Environment, and Related Agencies Appropriations Act, 2025, which would prohibit funding for any diversity, equity, and inclusion program or office at the environmental agencies funded by this bill. This amendment would block efforts to improve recruitment and retention of a federal environmental workforce that is more reflective of the diversity of backgrounds, experiences, and perspectives of the U.S., and it would also block efforts to reduce climate and environmental injustices in communities on the front lines of our nation's most dangerous environmental and health hazards. For too long, communities of color, communities of low wealth, and other historically underserved groups have been forced to bear the brunt of climate change's impacts and pollution and have had limited access to the benefits of our lands, oceans, and other natural spaces. Programs to correct these injustices and develop a diverse federal workforce that can advance

these and other environmental priorities are important and should be maintained. On July 24, the House approved the Brecheen amendment by a vote of 211–202 (House roll call vote 388). **NO IS THE PRO-ENVIRONMENT VOTE.** The Senate took no action on this legislation.

## **25. BLOCKING FUNDING FOR ENVIRONMENTAL JUSTICE**

Representative Chip Roy (R-TX) sponsored, and Representative Scott Perry (R-PA) offered for debate, an amendment to H.R. 8998, the Interior, Environment, and Related Agencies Appropriations Act, 2025, which would block efforts to advance environmental justice, including those to reduce pollution and climate threats in communities on the front lines of our nation's most dangerous environmental and health hazards. For too long, communities of color, communities of low wealth, and other historically underserved groups have been forced to bear the brunt of damaging projects, climatic hazards, and health-harming pollution. Federal programs, policies, and agency workforce initiatives that remedy these injustices are important and should be maintained. On July 24, the House approved the Roy amendment by a vote of 210–204 (House roll call vote 397). **NO IS THE PRO-ENVIRONMENT VOTE.** The Senate took no action on this legislation.

## **26. ANTI-ENVIRONMENT SPENDING PACKAGE**

Representative Mike Simpson (R-ID) sponsored H.R. 8998, the Department of the Interior, Environment, and Related Agencies Appropriations Act, 2025, which would cut spending on environmental programs to the lowest levels in decades, including a 20% cut to the Environmental Protection Agency (EPA). This bill would zero out spending on environmental justice programs and stymie basic clean air and water protections and environmental cleanup programs. It would mandate fossil fuel lease sales and imperil critically endangered species, among dozens of other extreme and damaging provisions. It would also block funding for landmark climate achievements, including the American Climate Corps' historic job-creation program, the immensely impactful Methane Emissions Reduction Program, and more than a dozen critical climate and public health rulemakings and executive orders, such as those limiting pollution from power plants and vehicles. On July 24, the House approved H.R. 8998 by a vote of 210–205 (House roll call vote 399). **NO IS THE PRO-ENVIRONMENT VOTE.** The Senate took no action on this legislation.

## **27. BLOCKING ELECTRIC VEHICLE TAX CREDITS**

Representative Carol Miller (R-WV) sponsored H.R. 7980, the so-called End Chinese Dominance of Electric Vehicles in America Act of 2024, which would block the electric vehicle (EV) tax credits that were signed into law as part of the Inflation Reduction Act (IRA). Transportation emissions contribute to climate change more than any other sector, and EVs are critical to reducing climate pollution and other health-harming emissions. This bill would create widespread uncertainty in domestic vehicle manufacturing and scramble automakers' plans to build and roll out EVs in the U.S., which would negatively impact autoworkers, car dealers, and potential EV owners. On September 12, the House approved H.R. 7980 by a vote of 217–192 (House roll call vote 417). **NO IS THE PRO-ENVIRONMENT VOTE.** The Senate took no action on this legislation.

## **28. IGNORING CLIMATE RISKS TO RETIREMENT SAVINGS**

Representative Rick Allen (R-GA) sponsored H.R. 5339, the so-called Protecting Americans' Investments from Woke Policies Act, which included the Roll back ESG to Increase Retirement Earnings (RETIRE) Act, and would repeal the Department of Labor's (DOL) rule to protect peoples' retirement savings from all types of financial risk, including those due to climate change. For decades, the DOL set forth rules that required retirement plan managers to prudently consider all relevant factors while remaining neutral on investment types. In 2020 the Trump administration deviated from this long-standing approach, and the Biden-Harris administration restored neutrality. Plan managers can once again consider all relevant factors to assess investment risk, and base their decisions on these financial risk-return factors. Overturning this rule would return to the Trump-era standard that disregards the financial risks of dirty energy investments, standards that are being implemented in extremist Republican-led states across the country at a significant financial loss for their pension funds. On September 18, the House approved H.R. 5339 by a vote of 217–206 (House roll call vote 427). **NO IS THE PRO-ENVIRONMENT VOTE.** The Senate took no action on this legislation.

## **29. ELIMINATING EPA'S CLEANER CARS RULES**

Representative John James (R-MI) sponsored H.J. Res. 136, a Congressional Review Act (CRA) resolution of disapproval, which would repeal the Environmental Protection Agency's (EPA) final rule establishing critical limits on climate- and health-harming pollution from cars and light trucks and block any substantially similar regulations in the future. The CRA is an extreme and blunt tool that is being used by anti-environmental members of Congress who want to permanently strip away protections for our environment, communities, wildlife, and natural heritage. The EPA's cleaner vehicles rule is vital in reducing emissions, safeguarding the environment, saving consumers money, and protecting public health. The transportation sector is the largest source of climate pollution – accounting for 29% of U.S. greenhouse gas emissions. The EPA's cleaner cars standards will help to reduce such climate pollution. The EPA's rule also protects the air that we breathe by reducing health-harming pollutants like soot or particulate pollution and nitrogen oxides, a component of smog pollution. Cleaner vehicles are especially important in communities of low wealth and communities of color that are disproportionately impacted by tailpipe pollution. On September 20, the House approved H.J. Res. 136 by a vote of 215–191 (House roll call vote 438). **NO IS THE PRO-ENVIRONMENT VOTE.** The Senate took no action on this resolution.

## **30. SHORT CIRCUITING ENVIRONMENTAL REVIEW AND PUBLIC INPUT FOR COMPUTER CHIP FactORIES**

Senator Mark Kelly (D-AZ) sponsored S. 2228, the Building Chips in America Act, which would eliminate environmental review and public input under the National Environmental Policy Act (NEPA) for certain semiconductor manufacturing facilities. The bill is unnecessary. Federal permitting is not delaying chips manufacturing projects, and following the bill's introduction, the Biden-Harris administration adopted the categorical exclusions that the bill would have established. On September 23, the House approved S. 2228 by a vote of 257–125 (A two-thirds majority was needed for passage; House roll call vote 440). **NO IS THE PRO-ENVIRONMENT VOTE.** On October 2, the president signed it into law.

### **31. STIFLING PUBLIC INPUT AND ENVIRONMENTAL REVIEW ON NATIONAL FORESTS**

Representative Bruce Westerman (R-AR) sponsored H.R. 8790, the so-called Fix our Forests Act, which, under the guise of addressing wildfire concerns, would open access to millions of acres of federal land for logging without thorough scientific review and community input. The bill would roll back bedrock environmental laws, removing Endangered Species Act (ESA) consultation requirements and weakening or circumventing National Environmental Policy Act (NEPA) processes on millions of acres of federal public lands. It would stifle public input and also diminish the public's rights to judicial review for potentially damaging projects, including shortening the review period after public notice to just 120 days. On September 24, the House approved H.R. 8790 by a vote of 268–151 (House roll call vote 448). **NO IS THE PRO-ENVIRONMENT VOTE.** The Senate took no action on this legislation.

### **32. ELIMINATING DUE PROCESS FOR NONPROFITS**

Representative Claudia Tenney (R-NY) sponsored H.R. 9495, the so-called Stop Terror-Financing and Tax Penalties on American Hostages Act, which would give the secretary of the Treasury total decision-making power to designate terrorism aiding organizations and revoke tax exempt status, while also eliminating due process for accused nonprofit organizations. Concentrating this power in one politically-appointed position would increase the risk of these authorities being abused and weaponized against nonprofit groups, particularly those that may be critical of the federal administration or political party in power. Threatening civil society is a threat to our democracy. Furthermore, there are already well-functioning rules and processes that forbid and hold accountable any nonprofit organization aiding terrorism. On November 21, the House approved H.R. 9495 by a vote of 219–184 (House roll call vote 477). **NO IS THE PRO-ENVIRONMENT VOTE.** The Senate took no action on this legislation.

### **33. SUPERCHARGING ATTACKS ON ENVIRONMENTAL AND CONSUMER PROTECTIONS**

Representative Andy Biggs (R-AZ) sponsored H.R. 115, the so-called Midnight Rules Relief Act of 2023, which would significantly expand the Congressional Review Act (CRA) by allowing Congress to eliminate dozens of administrative rules with one resolution instead of weighing each federal safeguard with separate resolutions. The CRA is an extreme and blunt tool that is being used by anti-environmental members of Congress who want to permanently strip away protections for our environment, communities, wildlife, and natural heritage. Further concentrating congressional power and circumventing appropriate discussion and consideration would put our environment and communities even more at risk. On December 17, the House approved H.R. 115 by a vote of 210–201 (House roll call vote 509). **NO IS THE PRO-ENVIRONMENT VOTE.** The Senate took no action on this legislation.
